

Simply Accounting by Sage 2009 Important Installation Information

Please visit: www.simplyaccounting.com/install

This Web site includes important information about installing Simply Accounting 2009, allowing your computer's firewall to work with Simply Accounting, storing your database files with a server, downloads, and answers to other questions you may have about getting started on Simply Accounting. Please read the following installation instructions and visit this Web site for further information.

To install Simply Accounting 2009:

1. Start Windows.
2. Insert the Simply Accounting CD into your computer's CD-ROM drive.
3. If the installation starts automatically, go to step 6. If it does not, continue with step 4.
4. Choose Run from the Windows Start Menu.
5. Type d:\launch and press Enter (substitute the letter of your CD drive, if other than "d").
6. Choose Install Simply Accounting.

If you have a Linux Server:

Simply Accounting 2009 supports the following Linux environments for data storage:

- SUSE® Linux® Enterprise Server 10 by Novell
- Red Hat® Enterprise Linux Server 5

To store your company data on one of these operating systems, please download the Linux version of the Simply Accounting Connection Manager and its setup directions.

If you have multiple computers connected:

If you have more than one computer on your home or office network, your Simply Accounting data files may be stored on one of the computers you will be using with your Simply Accounting 2009 product or on a server. If you store your data on a server where you do not require the full program to be installed, remember to perform a data-only installation on the server in order to complete the installation process.

The data-only installation will install the Connection Manager to the server, but will not install the full Simply Accounting program.
